

Visiting old friends

A Gameplay Programming bot by

Nikos Vanden Broek 2DAE5

Things to keep in mind

- ◆ Find and pick up items
 - ◆ Maintain balanced inventory
 - ◆ Avoid / shoot enemies
 - ◆ Bonus points from checkpoints
-
- ◆ Items always in buildings
 - ◆ Items stack up in buildings least visited

Learned world data

- ◇ Scan the entire map once
- ◇ Remember buildings, their doors, and last visit
- ◇ Remember items seen but passed by for different reasons
- ◇ Temporary images of enemies to avoid

Obstacle avoidance

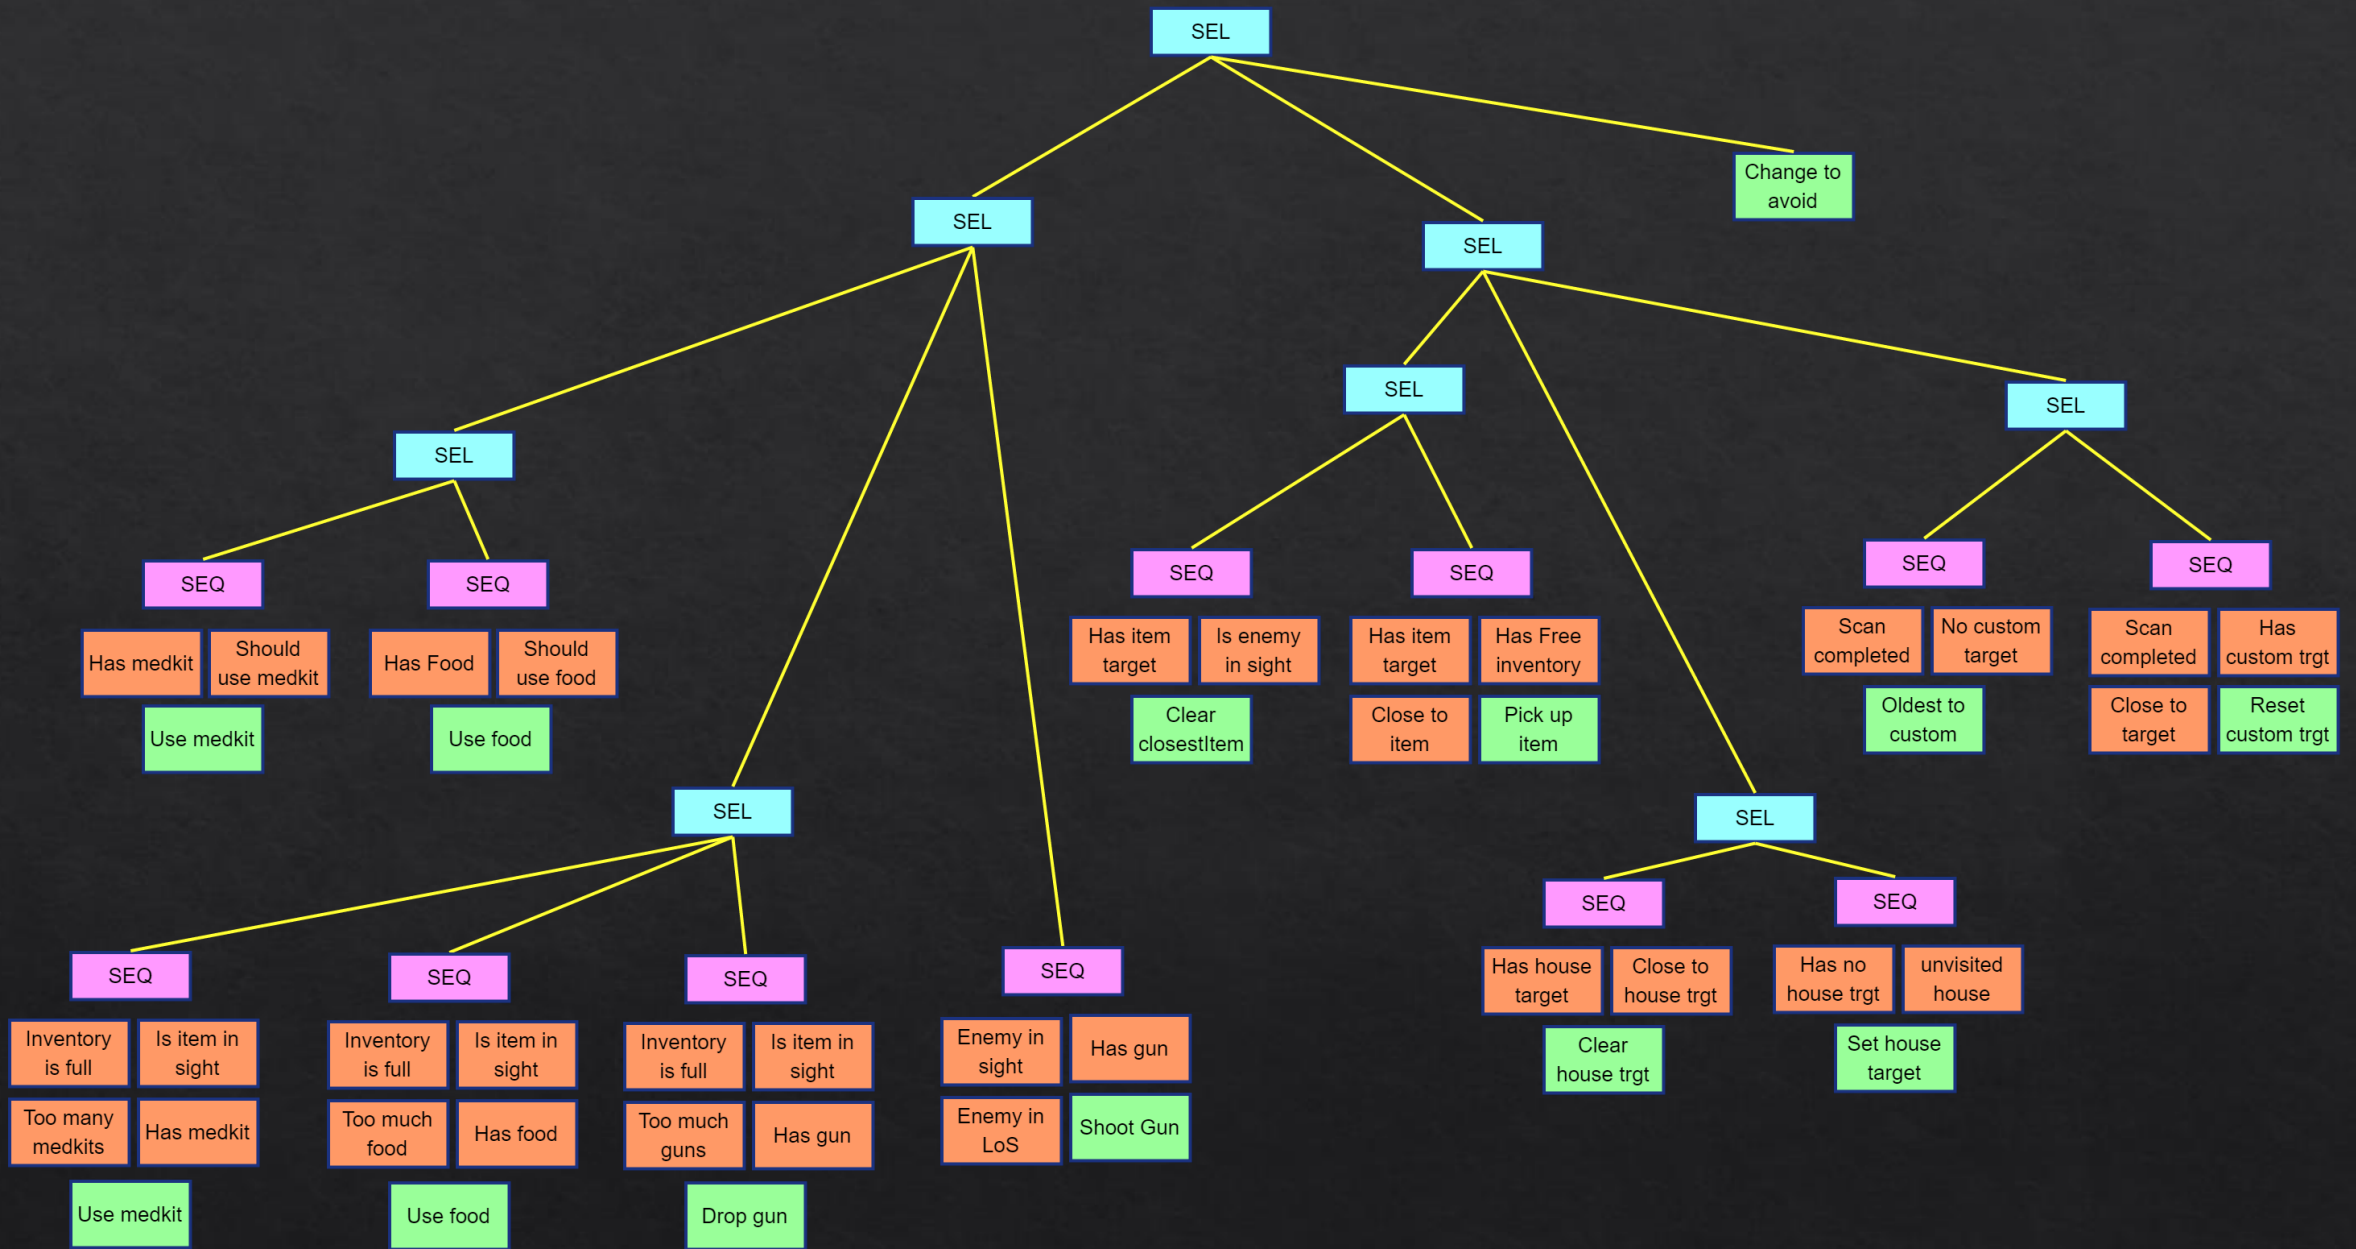

- ◆ Uses temporary enemy images to avoid actual enemies
- ◆ Uses building walls to avoid steering into walls

Steering into a wall

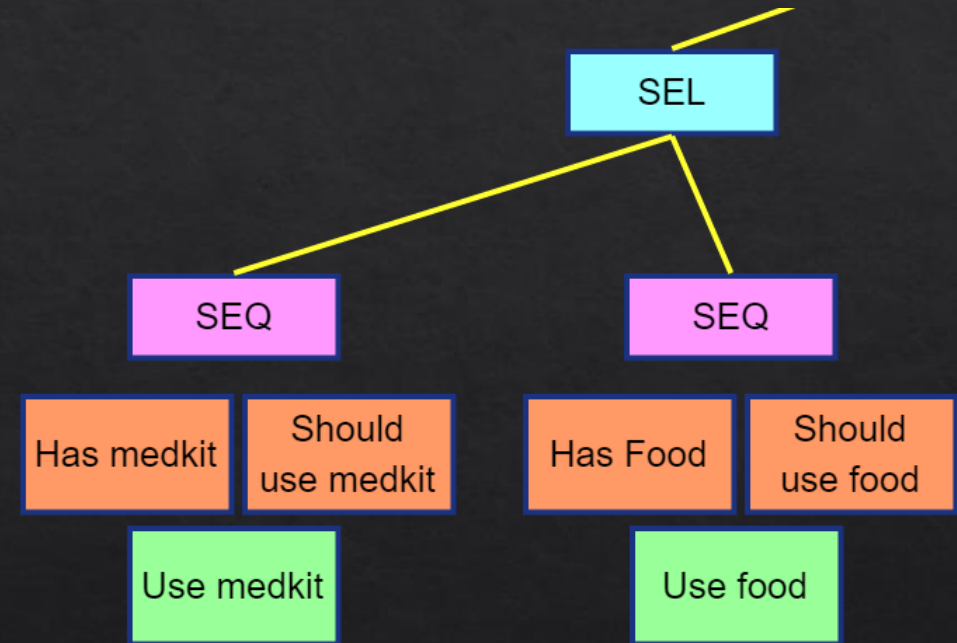

Mirror target away from wall

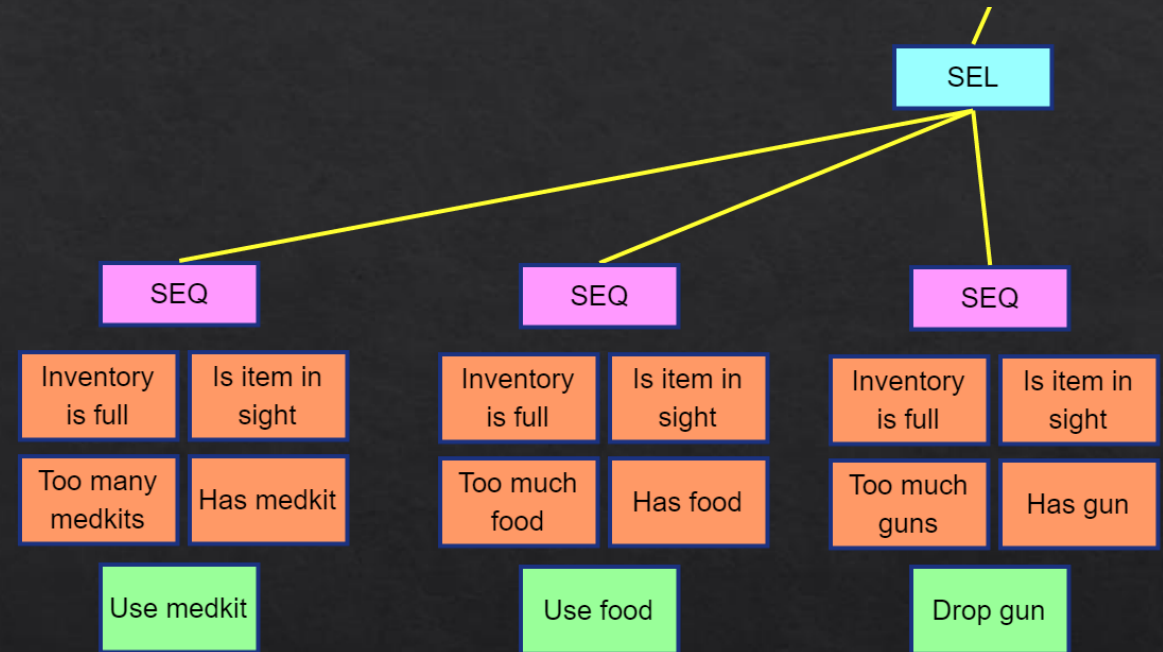

Staying alive

- ◇ Use the weakest item first
- ◇ Is missing health $>$ weakest heal
- ◇ Is missing stamina $>$ weakest food

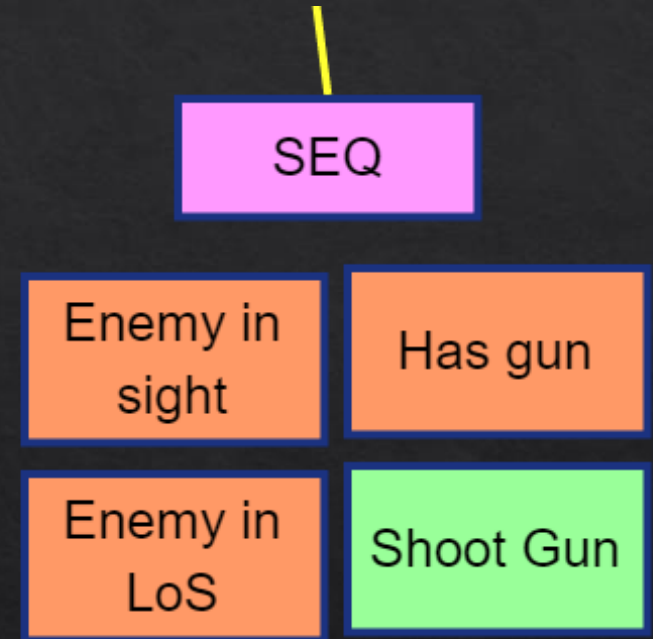

Inventory management

- ◆ Plugin provides data about number of each type, and weakest of each type
- ◆ Don't care about inventory unless it's full and we see an item
- ◆ Find the item type we have the most of
- ◆ Use weakest med kit or food
- ◆ Drop weakest gun
- ◆ If same amount take order :
Med kit - Food - Gun

Enemies

- ◆ Check if enemy in our LoS using Circle-Line intersection
- ◆ If in sight but not LoS, determine shortest rotation target
- ◆ Tree provides data when enemy in sights and if bot should rotate
- ◆ Plugin handles the rotation

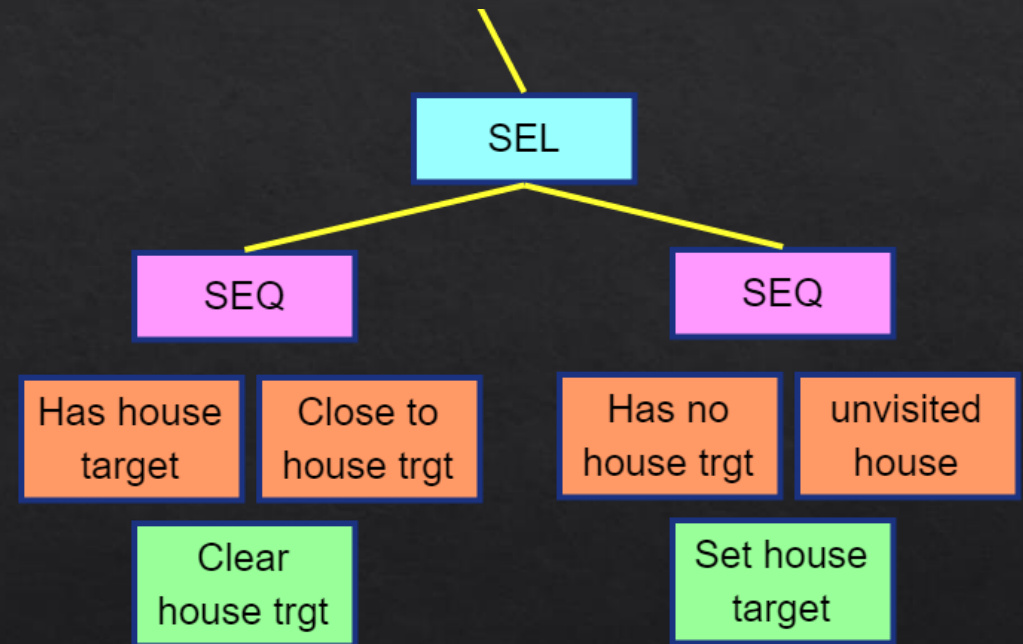

Picking up items

- ◆ Plugin provides closest item in FoV
- ◆ In none in FoV, provide missed one through learned world data
- ◆ Pick up item once in range, instantly drop if it's trash

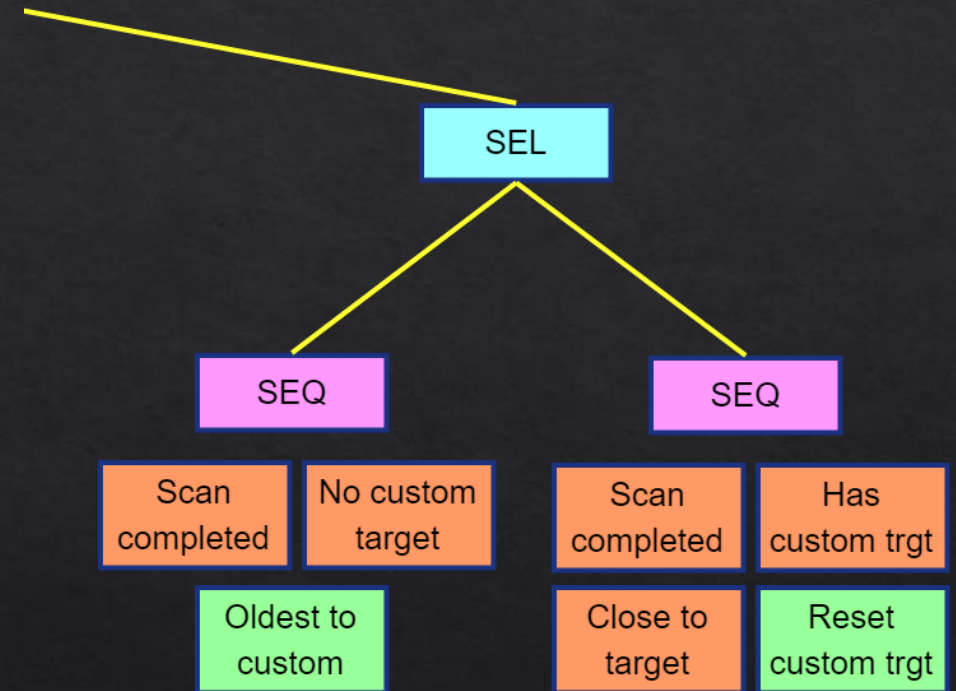

Visiting houses along the way

- ◆ Visit houses we run into along the way once
- ◆ Remember which houses have been visited and update their 'last visited' time using alive time
- ◆ Reset list when scan finishes, reaching custom target, or picking up checkpoint

Visit old friends

- ◆ Learned world data remembers which hasn't been visited in the longest time
- ◆ Once visited, oldest becomes most recent, go to new 'oldest' visited house
- ◆ Guarantee all houses get visited regularly

Recap

- ◇ Scan the world once to get every house
- ◇ Once scan is done, keep going to the longest unvisited house
- ◇ Check other houses we run in to along the way
- ◇ Pick up any item we find along the way and keep a balanced inventory
- ◇ Pick up the checkpoint if it's in the same house
- ◇ Avoid/shoot enemies we run in to
- ◇ Live forever
